

# Fuel Injector Cleaning

---

Fuel injectors get dirty from time to time and should be professionally cleaned. If you have ever used aerosol paint you may have seen the nozzle clog with paint residue. An injector does the same and when it does, instead of spraying in a 45 degree pattern it sprays in a stream. This is bad for an engine and wastes fuel. Cleaning injectors renews the spray pattern. Call for an appointment for this fuel-saving service.

Price: \$69 + Cleaner
